

A higher grade of
careful work habits

Clean up flattening
and reduce the risk
of leakage.

— Copper Repair Tool TA504SA —

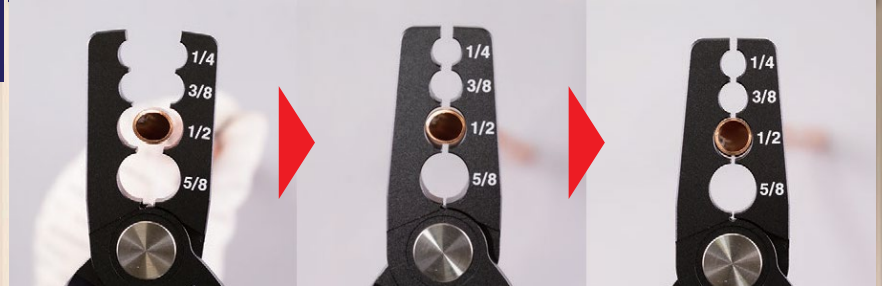

Risk reduction with a single step before flaring

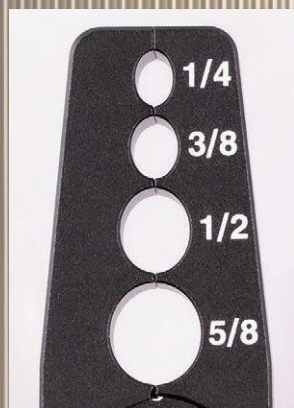

Part No	Name	Tube O.D.
TA504SA	Copper Repair Tool	1/4" 3/8" 1/2" 5/8"

Easy to modify by simply inserting it several times

The key to a clean finish is to slowly return it in several times
while changing the place of pinching.

Unique geometry
efficiently
corrects shape

The shape is uniquely
designed instead of
a perfect circle to
efficiently correct
flattened copper tubes.
