

PVC Cutter
TA643VP

For A/C drain pipe only *

Introducing a cutter with a special blade that specializes in cutting A/C drain pipes!

 Made in JAPAN

Ultra-thin, Sharp-edged blade

By analyzing, testing, and verifying the characteristics of the A/C drain pipes with materials that change depending on the layer, we succeeded in minimizing the cracks when cutting.

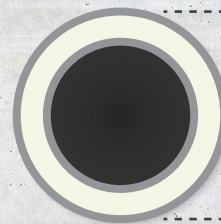

Hollow grind processing that is easy to cut

In order to pursue the sharpness of the blade, a hollow grind was adopted, which is said to be difficult to process. This is also extremely relevant to prevent cracks from forming.

Special coating that gives a beautiful cut surface

A beautiful cut surface is accomplished by applying a special coating that reduces resistance during cutting.

For
6.35 mm
to
38.10 mm

※ Some A/C drain pipes are not supported.
